Paul,

I appreciate your extreme patience with us. Our plan was to have this taken care of last year. We have been working with Robert Hicken from Mountain Valley stone to get a plan to reclaim the property or for them to purchase it. I know they have met with the land owners. At this point it is probably better for us to re-permit it. I'll go ahead and submit the information.

Thank you,

Louie Zamaroni

Hi Louie,

We haven't heard back from you since our last letter (dated March 21, 2014), and you have not either re-permitted your Antelope Valley site or reclaimed it, as required in the letter. I've left multiple phone messages with you with no response. We're getting ready to send another letter requiring either re-permitting by May 15, 2015, or reclamation by June 1, 2015, and I thought I should let you know immediately so you can start planning.

Enforcement action is almost certainly going to occur if re-permitting or reclamation don't happen as required in the letter. I would be justified in issuing a violation now, but I prefer to try to communicate first and make sure we have a complete picture and give people the benefit of the doubt.

It would be good for you to give me an update ASAP. Give me a call if you have any questions.

Peter

Subject: Antelope Valley Mine (S/039/0016) - informal permitting help for Small Mining Operations in Utah

Hi Jeff,

Thanks for the call. See the forwarded information below which should help provide the information required to bring the expiring Antelope Valley mine permit up to date. As I mentioned, your current mine ID of S/039/0016 will be retained.

First, here is some site-specific instructions for your permit, followed by the general instructions.

The existing quarry is not near any area identified for sage grouse conservation, so 3) below is a non-issue.

You will need to make sure that the operator going forward (assumed to be the current operator, Zamaroni Quarry Inc.) has an up-to-date business license (see 4), since I believe the current license has expired.
